

Build Success with Experienced, Dynamic Process Simulation

audubon

Total Flexibility. Total Solutions.

Audubon Malaysia specializes in a wide range of flexible solutions for the offshore industry, including SURF (Subsea, Umbilicals, Risers, and Flowlines).

Based in Kuala Lumpur, we also offer 30 years of proven project success in providing engineering process simulation modeling, including multi-platform simulation, to reduce risk and better quantify uncertainty for our clients.

Our commitment is to work with you to exceed your expectations with total flexibility and total solutions.

Audubon is a full-service, multi-discipline energy contracting firm serving the oil & gas, petrochemical, refining, communications and power industries. We offer an extensive range of engineering disciplines and a complete design department implementing the latest technologies. Our project managers, engineers, designers, systems integrators, and construction managers specialize in all phases of project execution.

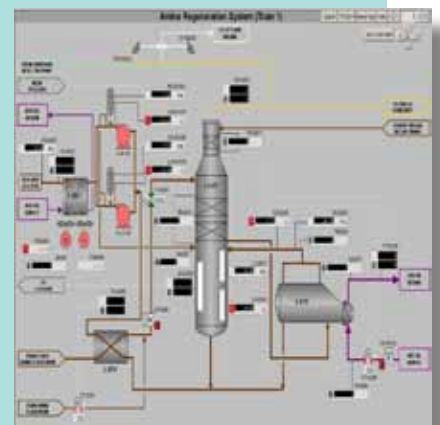

Process Simulation Services

- Steady state/dynamic process modeling
- Process optimization
- Process case studies
- Model conversion
- Flow assurance
- Process simulator
- Operator Training Simulator (OTS)

Process Simulation Experience

- Upstream and topsides facilities
- Common refinery units
- Gas processing plants
- Petrochemical plants (MTBE, PDH, PP)
- Vendor package units

Find out how your company can benefit from Audubon Malaysia's Process Simulation Services. Please contact your Audubon representative, or visit our web site at www.audubon-engineering.com.
